

UPCOMING WEBINAR

Using Data to Improve Outcomes for California Students from Cradle-to-Career

Educators, Practitioners, and Administrators:

Join us for a webinar on Thursday, October 15, 2020 from 4pm to 5pm

How well does your institution prepare students for success in school and beyond?

Newly linked data systems will significantly enhance California's ability to answer the state's most pressing questions about how well it serves its students.

We invite you to an informational webinar focused on a new, innovative statewide initiative for California that will make education, training, and employment information more accessible for all.

Easy-to-use visuals, sophisticated search tools, and planning resources will allow you to identify equity gaps and develop strategies to better support your students.

In this webinar, you will learn about:

- The types of data that would be available to help more students learn, stay in school, prepare for college, graduate, and secure a living wage
- How you can share your input about the proposed tools

Register today to learn how the Cradle-to-Career Data System will support decision making in California's schools.
